Fruit

As a Sugar burner, you can eat unlimited quantities of certain fruits. Enjoy fresh fruit whenever possible.

Apples, Berries (blackberries, blueberries, boysenberries, gooseberries, loganberries, raspberries, strawberries), Cherries, Grapefruit, Lemons, Limes, Pears

If you eat fruits that are not on your list, that's fine, but then you must treat them as if they're starches and limit them to your specific bite rule to keep you in an elevated fat-burning state. For example, as a sugar burner and you love bananas; have just 3 to 5 bites per meal. Eventually knowing which fruits are good for you and which should be limited will become second nature.
